Missionary United Church.

Report of Cream Prices

For the week ending June
14, 1930, the following prices
were reported paid by cream-
eries per pound of butterfat,
in several grades of cream,
and at the points shown:

Pomona Creamery, special
grade, 27c., No. 1, 25c. 23c.
No. 2, 22c. 21c.
Minimum: Special grade, 26c.,
25c., No. 1, 24c. 23c., No. 2, 21c.
20c.

Price changed June 11th.

For Sale

Nearly new Case Separator, 20 inch,
McIntosh's heavy. Header. Two
Bergras. Will give time or take cattle
on exchange.—Tom Rowles.

Sinus Trouble

In our skulls, there are busy
cavities, lined with delicate
membrane which is continuous
with the mucous membrane of
the nose and throat. These
cavities are the head sinuses.
They are located above the eye-
brows, behind the eye sockets,
back of the upper part of the
nose, on either side of the nose
below the eyes, and behind the
ears.

These sinuses have certain
pores in common. They are
situated close to vital struc-
tures, the openings into them
are very small and are shut off
by any swelling of the lining
membrane which may result
from infection causing inflam-
mation. They are frequently
subject to infection which gains
entrance along the membrane
from the nose or throat, or
which is carried to the sinus by
the blood stream from some
focus of infection, as, for ex-
ample diseased teeth or tonsils.

Infection causes inflam-
mation and one symptom of
inflammation is swelling. The
swelling shuts off the opening
from the sinus. If the infection
develops, pus is formed. The
pus cannot drain out be-
cause the exit is blocked, by
the swelling, and, as a result, a
serious condition develops.

The infection may subside
and the swelling go down, and
then the pus is discharged.
Otherwise, there is an abscess
locked in this bony cavity from
which it may spread from
which it may spread from
which it may spread from

In order to avoid sinus trou-
ble, everything possible should

Steel Laid On Line

Youngstown to Coronation

Steel on the line from Coro-
nation to Youngstown is now
laid, and is of 80 lb. gauge.
Balisating is expected to be
completed in the course of
three or four weeks. The
track-laying gang were re-
ported as going to Bulwerk, to
lay steel across the bridge that
would give rail connection with
Lorneville.

Wm. Haines In

"The Duke Steps Out"

The new picture is a filmiza-
tion of the Saturday Evening
Post story by Lucian Cary.
Haines plays a prize fighter
who enters college to please his
sweetheart, and his trials and
tribulations furnish hilarious
comedy, while the fight hand-
icaps thrill. His love affair
with Joan Crawford supplies a
pretty romance.

The cast includes Karl Dane,
Toren Holtz, Eddie Nugent,
Dolmer Daves, Lake Cowgore,
Herbert Prior and many other
of note.

The fight scenes were staged
at the Hollywood Legion Sta-
dium, where the screen colony
attends weekly fight events.
Haines fights in the ring with
Jack Roper, noted heavyweigh-
t championship fight contender.

This picture is showing Fri-
day and Saturday of this week.

be done to avoid colds and other
respiratory infections which
may be the beginning of the
conditions. If such infections
are contracted, then prompt
and proper treatment should be
taken to avoid the possible ser-
ious complications, one of which
is sinus infection. Bed is the
place for a person with a res-
piratory infection. Rest, elim-
ination, warmth and a suitable
diet increase the fighting power
of the body against the invading
germs. Care should continue
during convalescence, as in
all probability, there are
some germs still remaining ac-
tive and ready to seize any op-
portunity to cause trouble.

A person who carries around a
focus of infection in teeth or
tonsils is always open to the
danger of the spread of infection
from such a focus. The re-
moval of foci of infection is a
measure of prevention against
sinus infection.

Alberta Elections

The Alberta elections have
come and gone. While the
government forces were de-
pleted, Premier Brownlee still
retains power with a good
working majority over a strong
opposition. In the local
riding, W. C. Smith, U.F.A.
member, was returned over the
Independent candidate, Mr. E.
A. Mantz, by some two hun-
dred votes. The standing of the
various parties at present is:

U.F.A., 40.
Liberal, 9.
Conservative, 6.
Labor, 4.
Independent, 3.
1 Doubtful.
There is likely to be a recount
in the Cochrane riding where
McCook, U.F.A., had twelve of
a majority over Land, Liberal.

Copious Rainfalls

During the past week this
district has been refreshed with
copious rainfalls which have
given renewed life to the crops.
Friday's and Saturday's rain
measured 1.20 and north of
town where it was heavier 1.25
of an inch. On Monday, the
town received the edge of a
storm, which north of town
was in the nature of a cloud
burst and some fields were
completely inundated with wa-
ter. Ditches were full and road-
ways flooded; Southwest of
town, the rainfall while not
so heavy, has been plentiful.

Fifth Fortnightly Govt. Crop Report

Issued by Dept. of Agriculture,
June 21, 1930.

Reports received from south
of Calgary, indicate that dur-
ing the past fortnight several
windy days with high tem-
peratures have checked growth
which up to that time had been
very satisfactory. Summer
fallow had been standing up
well but crops sown on spring
ploughing were beginning to
suffer. Little or no rain had
fallen during this period, but
reports of rains over a large
area on the night of June 20,
creates a much improved crop
prospect. Irrigation has been
generally practised throughout
the irrigated areas.

In the Central and Eastern
part of the province, rains with
in the past few days have done
much to relieve the serious
condition caused by continued
dry weather and high winds.
Estimates place the damage
from wind and outcrops as
high as 40 p.c. Much of this
land has been reseeded, but in
some cases this was impossible
owing to the difficulty in se-
curing seed. The western and
northern areas have abundant
moisture and their growth
need is for warm weather.

Along the C.N.R. lines east-
ward of Edmonton and north
of them, heavy rains have fal-
len. St. Paul reports five inches
since June 1st, and Vermilion
3.91 from June 10 to June 13.
The Peace River district con-
tinues to have abundant mois-
ture with slight damage from
floods in the eastern part. In
sect injury, particularly from
outcrops, is greater than usual
otherwise crop conditions are
favorable.

Hay and pasture crops are
reported to be doing well, ex-
cept in the areas which suf-
fered so severely from high
winds and lack of moisture.

The sugar beet crop is about
70 per cent. thinned. Some
damage has been done by cut-
worms, but otherwise the out-
look is promising for a favor-
able production of beets.

Empress Win At Acadia

The Empress ball players met
the Valley team at Acadia
Valley, on Wednesday, and
avenged themselves for the
heavy defeat sustained early
in the season. The Empress
team administered a similar
beating, pounding out twelve
runs in the first innings. After
this deluge of scoring the game
ruled more even. The league
standing is:

Empress..... 4 wins 1 loss
Bindloss..... 2 2
Acadia Valley 3 1

tered so severely from high
winds and lack of moisture.

The sugar beet crop is about
70 per cent. thinned. Some
damage has been done by cut-
worms, but otherwise the out-
look is promising for a favor-
able production of beets.

Mrs. H. Westcott is reported
very ill with pneumonia.

Sale and Redemption of Impounded Animals

Notice is hereby given under Sec-
tion 48 of The Domestic Animals Act (Muni-
cipalities) that one Dark Bay Colt, star
marked, white brand, was im-
pounded in the pound kept by Joe Rad-
ford, Acadia Valley, Alta., located on
the S.W. 1/4 31-24-3 W. 4, on Monday,
the 12th day of May, A.D. 1930, and
that the said animal was sold on Friday
the 21st day of June, 1930, to Mike Skappak
of Acadia Valley, Alta.

And one Sorrel Mare, with colt at foot,
same as four white legs, old cut at foot,
star marked, white brand, was im-
pounded in the pound kept by Joe Rad-
ford, Acadia Valley, Alta., located on
the S.W. 1/4 31-24-3 W. 4, on Friday,
the 21st day of June, 1930, and that the said
animal was sold on the 9th day of June,
1930, to Sam Fox, of Bindloss.

And these said animals may be
redeemed by the owners or on their
behalf within a period of thirty days
from the publication of this notice
in the Alberta Gazette, upon payment of
all fees and costs due to the Municipality
and the purchaser of said animals.

For information apply to the under-
signed.

J. B. GRAHAM,
Sec. Treas. of the Municipality of
Acadia No. 241.

Post Office, Acadia Valley, Alta.

MAIL CONTRACT

SEALED TENDERS, addressed to
the Postmaster General, will be received
at Ottawa until 10 o'clock on Friday the
18th July, 1930, for the conveyance of
The Majesty's Mail, on a proposed Con-
tract for a period not exceeding four
years twice per week on the route
Bindloss Rural Route No. 1
(proposed)

from the Postmaster General's pleasure.
Printed notices containing further in-
formation as to conditions of proposed
Contract may be seen and blank forms
of Tender may be obtained at the Post
Office of Bindloss, Alta., and at the
office of the District Superintendent of
Postal Service.

J. B. CORLEY,
District Superintendent of Postal Service.

Youthful Aviatrix Flies Alone From England To Australia In Moth Plane

Port Darwin, Australia.—Miss Amy Johnson has kept in fame as Britain's premier aviatrix by her 19-day flight from England to Australia.

Miss Johnson is 26 years old. She is the first woman to fly alone from England to Australia, making the long journey in a tiny moth plane. In so doing she completed in 19 days a flight from Croydon, England, she left there May 5, hoping to beat Bert Hinkler's record of a 15-day flight from island to continent, but bad weather and accidents delayed her in the later stages of her trip and she fell behind her schedule after flying two days ahead of it for much of the journey.

She made a spectacular landing at the air field here. Three planes from Brisbane and one Dutch seaplane escorted her from afar out to the port. A large crowd, which had gathered, cheered her until they were hoarse.

Government officials were among those greeting the pretty young girl, who appeared a bit tired at the landing field. When she stepped out of the plane, she was greeted by a crowd of men, many of whom were in uniform. She was taken to a motor car to government house, where she was the guest of the north Australian government during her stay here.

Premier Scullin sent a message of congratulation from the government on behalf of the Federal Government, and extended her an invitation to come to the capital while parliament was in session.

London, England.—The King today sent his hearty congratulations to Miss Amy Johnson, first British woman to fly from England to Australia, in a telegram to the Australian Governor-General, which said:

"The Queen and I are thankful to know of Miss Johnson's safe arrival in Australia and heartily congratulate her upon her wonderful and courageous achievement. (Signed) George R. V."

In England joyfully welcomed the news of the young woman's success and her safety.

Intends To Open Campaign In Winnipeg

First Speech Of Hon. R. B. Bennett Will Be Broadcast

Ottawa, Ont.—Hon. R. B. Bennett, Conservative leader, will open his national election tour in Winnipeg, according to present plans. He will speak, probably, in the Amphitheatre Rink, and a radio network will be arranged to carry his words from Halifax to Victoria. The Conservative headquarters, apparently, intends to make full use of the radio in the coming campaign. The opposition have plenty of campaign funds and will be on at least a dozen and probably three national hook-ups.

Mr. Bennett's first speech and his closing speech will be broadcast over a national network. Bennett is the many of his other speeches will be broadcast over the section of the country in which the speech is made.

Bill Stopping Liquor Clearances To United States Passes Senate

Ottawa, Ont.—Without a recorded vote, the senate gave third reading to the government bill prohibiting the clearance of liquor to the United States. An amendment, moved by Hon. Rufus Pope, to the effect that the bill should not come into effect until proclaimed by the governor-in-council, was voted down by a majority of 20 votes. The vote was registered for 10, against 30.

Although several senators spoke against the bill, there was no registered vote on the main motion. A clerical error, the substitution of the word "exportation," was corrected in amendment, and thus the bill will be returned back to the commons before becoming law.

Sir George Foster, for years one of Canada's chief temperance crusaders, was one of the bill's champions. He believed the people of the United States, through the imposition of the 18th amendment, had been misled by the liquor traffic. It followed that Canada's only proper attitude was to restrict the flow of liquor into that country.

In favoring the bill he said the principles upon which the bill was based were set forth both in the report of

NEW POST LAUREATE

John Masfeld, some time sailor and vagabond who has been appointed poet laureate of England. The poems "Doubter" and "The Everlasting Mercy," and novel "Sard Harke" are among his better known works.

Ask Amendment Of Criminal Code

Christian Scientists Want Clause Introduced For Their Protection

Ottawa, Ont.—A despatch from Ottawa to the Toronto Star, says that in a bill introduced by the government to amend the criminal code, a change has been made at the request of Christian Scientists in three sections, which deal with the obligations of heads of families, people in charge of the sick, and masters and mistresses of servants and apprentices under sixteen. It is explained the purpose of the section is to permit Christian Scientists to practice their beliefs without fear of prosecution.

The sub-section which is suggested for the criminal code in this regard is as follows: "Any obligation which may be involved in this or two preceding sections to supply medical or surgical attendance as 'necessaries,' or 'necessaries of life,' shall not apply to, or affect persons using or depending on prayer or spiritual means for the treatment of human ailments as an enjoyment or exercise of religious freedom."

Saskatoon Cadets Victors

Win Junior Shield In Dominion Rifle Shoot

Ottawa, Ont.—A youthful team of five from Saskatoon, led by Junior Sheld in the winter cadet shooting indoor series held throughout Canada under the auspices of the Dominion of Canada Rifle Association. A report issued from headquarters of the association shows the Saskatoon cadets compiled a high average of 97.11 out of a possible 100. The Quebec Seminary team won the semi-final, but was defeated by a shooting average of 88.80.

Granted World's Record

Montreal, Que.—Canada's foremost sprinter, Myrtle A. Cook, member of the 1928 Olympic team, recently received notification that she has been granted, officially, the world's record for the 100-metre sprint.

Jolly Beggars Broadcast Joy

"The most truly poetical of our jolly bunch," said Thomas Carlyle, "is one which does not appear in print before and since, under the humble title of 'The Jolly Beggars.'"

The broadcast was arranged and orchestrated from the edition of 1818 (harmonized by Bishop), by Mr. Wood Hill, in collaboration with J. Campbell McInnes. "The Jolly Beggars" was presented as a ballad-opera by the Alfred Heather Light Opera Company in the Canadian Pacific Railway's programme of music from station WJZ and twelve associated stations of the National Broadcasting

No Duty On Foreign Wheat

British Government Is Opposed To Tax Says Minister

London, England.—The question of preference for the Canadian wheat-grower in the British market over foreign wheat-growers came up in the House of Commons. Mr. Hon. William Graham, president of the Board of Trade, in reply to the suggestion, said the government did not intend to impose any duties on foreign wheat, so that the question of granting Canada preference did not arise.

The answer brought a spirited query from the Conservative benches. "Do we understand the government's reply to the Canadian tariff concessions is that we can only treat the same as we treat foreign governments?" Mr. Graham was asked.

"Not necessarily," the cabinet minister replied. "The questioner spoke of a tax on all imported wheat. The government is opposed to this."

Naval Agreement Is Attacked By Admirals

Places Their Navy In Inferior Position Say U.S. Officers

Washington, D.C.—Two more admirals told senate committees that the London naval treaty would leave the United States in a position of inferiority.

Admiral J. V. Chase, of the General Board, said the pact did not represent parity with Great Britain, sections, which deal with the obligations of heads of families, people in charge of the sick, and masters and mistresses of servants and apprentices under sixteen. It is explained the purpose of the section is to permit Christian Scientists to practice their beliefs without fear of prosecution.

Although he was an adviser at the London conference, Rear Admiral J. P. F. Pringle said, he was consulted but once by the United States delegation. He advised the delegates against a trainer arrangement they finally accepted.

Buys Valuable Stamps

King Fund, Of Egypt, Pays \$16,200 For Fine Collection

Cairo, Egypt.—King Fuad, of Egypt, has purchased what is described as the finest collection of Egyptian stamps in the world. He bought them from a Stockholm for \$16,200. An Egyptian monarch now ranks second to King George, of England, as a royal stamp collector.

King Fuad collects the stamps of many countries but has specialized in those of Egypt, the Sudan and the Arabian states. An English philatelist arranged most of the forty albums in which the collection is mounted.

Western Men Chosen

Saskatchewan and Alberta Doctors On Canadian Health Board

Toronto, Ont.—Dr. F. C. Middleton, of Regina, was elected president of the Canadian Public Health Association and Senator Gustav Lacasse, of Brandon, was chosen vice-president as head of the Ontario Health Officers' Association at the combined meeting of the two at Copeland, N. B., last night.

Dr. F. D. Munroe, Minister of Health for Saskatchewan, was chosen honorary president of the Canadian Association, while among the vice-presidents is Dr. M. B. Bow, Edmonton.

British Labor Party Upholds MacDonald By Overwhelming Vote

Conciliation Board To Settle Dispute

Dockers At Vancouver Wish Arbitration In Renewal Agreement

Ottawa, Ont.—A labor dispute involving 1,510 water front workers in Vancouver and district is to be settled by a board of conciliation under the Industrial Disputes Investigation Act, Hon. Peter Heenan, Minister of Labor, announced. The parties involved are the Shipping Federation of British Columbia and some of their employees who are members of the Vancouver and District Waterfront Workers' Association.

The men wish the renewal of the agreement with the employers covering wages and working conditions which expired November 30, 1929, with certain alterations. Two members of the board of conciliation have already been appointed: R. B. Pirie of Vancouver, on the recommendation of the employers, and J. E. Hall on the recommendation of the employees.

Mr. Heenan is awaiting word from these two board members as to the selection of a third member who will act as chairman.

New Minister To Canada

Harold MacNider Is Chosen For Position At Ottawa

Washington—Lieut. Col. Harold MacNider, of Mason City, Iowa, is the United States minister to Ottawa.

President Hoover has chosen and the Canadian Government has approved a distinguished soldier and financier to fill the post vacated by Hon. William S. Phillips. Colonel MacNider is a Harvard man, former assistant secretary of war and former commander of the American Legion for 12 years.

He entered the Coolidge administration as assistant secretary of war in October, 1928, serving until May, 1929.

Colonel MacNider's career as a business man and financier has been eminently successful. He is president of the First National Investment Company, of Mason City, Vice-president of the First National Bank, treasurer of North Western States Portland Cement Company.

Radio Stations For North

Two Will Be Able To Work Linking Up Arctic With Rest Of Canada

Ottawa, Ont.—Involving an expenditure of approximately \$67,000, two low power radio stations are to be established by the Dominion Government in the far north, one at Cape Hamilton, Cornwall Island, and the other at Chesterfield Inlet.

These stations to the network station linking up the Arctic with the rest of Canada have already been approved by order-in-council and the work of installation is to be carried out immediately by the Department of Marine and Fisheries.

Decision to establish the Coppermine station is timely in view of the influx of prospectors which is anticipated in the district. Both stations are to furnish meteorological reports which will have an important bearing on the successful navigability of the Hudson Bay route.

Subsidies Are Necessary If Insurance Scheme For Unemployed Is Adopted

Ottawa, Ont.—A scheme of unemployment insurance for Canada must of necessity be supported by government subsidies, said Prof. Gilbert E. Jackson, of the University of Toronto, in his address to the Political Science Association in annual session here.

Even in England, Prof. Jackson said, where labor statistics dating back 60 years were available, it had been found necessary to support the scheme by state assistance. It would be almost impossible to carry on unemployment insurance by workers' contributions alone in Canada, where the speculation of employment in future seasons could not be as well charted as in England even now.

The unemployment situation was

London, England.—The Labor Government, for the moment, save a modest vote, has elected the Labor Party Prime Minister Ramsay MacDonald by an overwhelming vote, the motion of censure moved by Sir Oswald Mosley, who has resigned as Chancellor of the Duchy of Lancaster, being defeated by 210 votes to 59.

There was intense anticipatory interest in the meeting as the prime minister had let it be known that should the Parliamentary Laborites vote against his ministry on the question of its handling of the employment problem, he would advise the King to dissolve the House of Commons and would put the issue before the electors of the country.

The Rt. Hon. George Lansbury, first commissioner of works, who had originally urged adoption of the Mosley scheme the contents of which only the Parliamentary Laborites know—is said to have urged the other members who had taken a similar stand to forego their criticism, at least for the time being, and to put themselves in a position behind the Labor Government which the Conservatives were attacking and the Laborites threatening over electoral reform.

Although Sir Oswald Mosley's motion was defeated, it is now believed will be adopted in some form as a back-bencher. His wife, Lady Cynthia Mosley, is now coming to Canada to visit her son, Lord Nottingham by-election, and she emphasized today that both she and her husband would remain loyal to the cause, but would reserve freedom of action in their efforts to persuade the party to adopt a more progressive unemployment policy.

R-100 Dips In Salute

Giant Dirigible Pays Homage To King And Queen

London, England.—The R-100 passed over London and saluted the King and Queen. Their Majesties were seated in the Royal Box at the Grosvenor Gardens. The dirigible loomed at once exactly overhead and dipped its great nose as an act of homage to the Sovereign.

The King stood erect and saluted as the R-100 tilted downward for a moment. The airship was accompanied by six planes. One looped the loop as thousands of pedestrians stopped to gaze. Motorists halted their cars; innumerable heads were thrust forth; the movement of traffic was suspended.

Japanese Immigration

Ottawa, Ont.—Two hundred and thirty-four Japanese immigrants were admitted to Canada in the month of September 1, 1928, up to the end of the last fiscal year, according to a report tabled in the House of Commons. Of these 130 were males, and the balance females. Fifty-eight were agricultural workers, and 56 were domestic servants. The remainder were children. Only 50 Japanese are permitted to enter Canada annually.

Dry Ice Test Shipment

Brandon, Man.—Two cars of eggs of the Manitoba Co-operative Poultry Association were shipped to Montreal under the dry ice test. This means insulated containers are placed in the cars and that circulating carbon dioxide gas preserves the eggs.

Canadians Have Much To Learn About Vast Empire Being Developed In North

So vast is the Canadian heritage and so numerous are the points offering promise of great and continuous development, that it is difficult for the most assiduous of newspaper readers to keep in touch even with his own province. For more distant information he is dependent on re-motest sources and therefore has all the more reason to appreciate editorial and other articles outlining what is being done in districts that are only in process of being opened to the light of day. Recently the Lethbridge Herald touched on the development of the Alberta Northland and remarked that as this is proceeding so British Columbia's great block of land east of the Rockies is coming in for a lot of attention. Speaking of the possibilities of this region it quoted Hon. F. P. Burden, Minister of Lands of that province as saying that the section had one of the best bodies of coal on the continent, and according to coal authorities it was the only coal on the continent that would smelt without coking.

In close proximity, Mr. Burden said, was a great body of iron ore. In years to come, he believed, steel and iron industry would be developed and would create a big demand for the agricultural products of the district.

There were also other minerals, the minister said, and possible hydro-development at low cost.

The Herald repeats its view previously expressed that in the vicinity of the head waters of the Peace River, and where they cut through the backbone of the continent on their way to the Arctic, there is a veritable empire of wealth such as few Canadians even dream of. Here are to be found valuable commercial timber and pulpwood. The surrounding foothills in which the late Lord Rhonda was interested lie in that area. Close by there are said to be mountains of iron, while it is also stated that mines as rich as the Sullivan at Kimberley may be developed. And with it all there is in the Peace River Canyon, water power capable of developing within a 12-mile stretch something like 1,500,000 horsepower.

While there is so much talk of a coast outlet for the Peace River country, it is well to bear in mind that the development of the mining, lumbering, pulpwood and hydro-power possibilities along the Peace River head waters, is practically certain to open up a route through the northern section of British Columbia. Somewhere along the course of that route will be a railway, and situated upon it, close to the Pacific, and closer to the Orient than any other British Columbia city, will be a modern city founded upon the wealth of resources in that area.

We really know very little as yet, the Herald says truly, about the great northland which, in a few years, will be pouring its treasure into the world's markets and so bringing back new wealth to Western Canada.

Settlers Are Keeping Ahead Of Railways

District In Northern Saskatchewan Rapidly Filling Up

Settlers are still keeping far in advance of the railway in the opening of the north.

For the past 10 or 12 years good crops have been grown in the Meadow Lake district, 60 miles north of North Battleford, and the growers have hauled their grain 60 miles to the nearest railway line.

This year the Canadian Pacific Railway is building a line through the Meadow Lake area but Meadow Lake is no longer far from the line. Every week hay-racks containing settlers' effects are to be seen ferrying the Beaver River, 20 miles north, making for a district on the other side which is rapidly filling up.

Goldbeaters in England recently beat a block of gold one and one-quarter inches square and one-thousandth of an inch thick into 76 sheets of gold, each five inches square.

British Acclaims Canadian Wheat

Sir James Dunn Says Manitoba Product Makes Best Bread

All who are interested in Empire Free Trade should make it their duty to demand an "Empire Loaf"—made of wheat flour produced in the British Empire—and popularize it among their friends, says Sir James Dunn, in a letter to the London Evening Standard.

Sir James, a native of Bathurst, New Brunswick, and now a prominent lawyer and husband of the Marchioness of Queensbury, says that apart from any question of imperial sentiment, the Empire loaf consisting of 85 per cent. Manitoba wheat, is the best bread in the world. His own researches into the relative nutritive values of Canadian and competitive wheats have shown the Manitoba wheat produces a bigger and lighter loaf, which gives greater nourishment than bread made from any other flour, he says.

Clean Soil In Run Necessary For Growing Chickens

Clean soil in the run is the one sure cure preventative for the most destructive poultry disease, the fowl cholera, asserts the Poultry Husbandman of the Dominion Department of Agriculture. And practicing what he preaches, the poultry runs at the Central Experimental Farm have been freshly ploughed and the rotation system of cleaning is under way on the runs used last year. A succession of hard, grain and green crops is used to remove all possible infection from the soil. Poultry should always be kept on clean soil, especially growing chicks, and crop rotation on the poultry run is the one most effective way of enabling nature to do the trick.

Ideal interpretation of wrap-around with drapes at side that combines with the surprise bodice that fastens at hip with buckle, to give the figure graceful length. The normal waistline is indicated by seaming which makes the tight fit through the hips and moulded bodice more prominent. The neckline with surprise vest is unusually becoming fashion.

It is designed in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

It is a model that makes up most attractively in crepe satin for the two surfaces can be nicely worn out for contrasting effect. The dark brown shade is especially popular. Black silk crepe with eggshell vest also for pattern. Address: Pattern Department.

Rice Growers To Compete

British Guyana May Have Exhibit At World Grain Show

In all probability rice growers from British Guyana will be represented in the competitive classes at the World's Grain Show, according to a letter received at the exhibition office, Regina, from J. Sydney Daah, director of the Department of Agriculture, Georgetown, British Guyana. The competitors of the prize list for the 1932 World's Grain Exhibition designed to make it as attractive as possible to the growers of all countries. For this reason, apart from the fact that the cash awards offered are higher than have been offered ever before, the classification embraces practically all of the grain and seed crops cultivated the world over.

The rice growers of British Guyana, one of the smaller parts of the British Empire located in the tropical regions of northern South America, are showing a keen interest, and according to word received at the World Grain Show office from Daah, exhibiting rice has been expected from that country. In concluding his letter Mr. Daah says that he hopes "this colony will be able to take part in your exhibition and competition to be held in 1932. I shall advertise it so that rice growers may have the opportunity to participate."

Clean Soil In Run Necessary For Growing Chickens

Clean soil in the run is the one sure cure preventative for the most destructive poultry disease, the fowl cholera, asserts the Poultry Husbandman of the Dominion Department of Agriculture. And practicing what he preaches, the poultry runs at the Central Experimental Farm have been freshly ploughed and the rotation system of cleaning is under way on the runs used last year. A succession of hard, grain and green crops is used to remove all possible infection from the soil. Poultry should always be kept on clean soil, especially growing chicks, and crop rotation on the poultry run is the one most effective way of enabling nature to do the trick.

Increase In Plant Imports

Canada Bringing In Large Number For Parks and Gardens

Canada's appreciation for the aesthetic in parks, gardens and amateur horticulture is reflected in the amazing increase which is reported in the importations of trees, shrubs, roots, perennials and bulbs. In 1919 the Plant Inspection Service of the Dominion Department of Agriculture examined 600,000 plants of various kinds of entry, while in 1929 the number examined was over 48,000,000. Inspection stations are maintained at Halifax, St. John, Quebec City, Montreal, Ottawa, Toronto, Niagara Falls, Windsor, Winnipeg, Estevan and Vancouver, where imported plants are examined to ensure freedom from insect pests and plant diseases.

Curious Custom In Ceylon

At a funeral recently of a native near Colombo, Ceylon, friends brought many gifts to the corpse. Each had something different, including cooked meat, fruits and various articles of domestic use. As the coffin was conveyed to the burial place on a huge pink and white structure resembling an ice cake, the gift-bearers accompanied it in solemn procession.

High-Class Poultry and Eggs

Believe it or not this picture represents \$700 worth of high class poultry and henfruit. Not many of them, it is true, but these hens are worth about \$50 apiece, while the three cockerels at the market price of \$100 each. The shipment is part of a big order being filled by the Record of Production breeders in co-operation with the University of British Columbia for poultrymen in the United States, China and Japan. Each hen in the shipment has a record of more than 300 eggs per year, while the cockerels also have imposing records. The shipment left Vancouver recently aboard the Canadian Pacific liner "Empress of Canada," for Honolulu.

R. S. McLaughlin

President of General Motors of Canada, Limited, and one of the outstanding industrial figures of the Dominion, Mr. McLaughlin was added to the board of directors of the Canadian Pacific Railway Company at the annual meeting of shareholders held early in May. Mr. McLaughlin is also vice-president of the General Motors Corporation of the United States.

University Is Loser

Alberta Regrets Removal Of Professor A. Burt To Minnesota

Anyone who went through the class-rooms of Professor A. Burt, of the University of Alberta, or heard him speak in public, will regret to hear that he is going to the University of Minnesota. For seventeen years, except for a period of war service, Dr. Burt has been at Alberta. He graduated from Toronto, and was a Rhodes scholar. Paying tribute to him, Dr. R. C. Wallace, president of the University, said: "He has established the position of a scholar in the way with the students of history in the University, and his books and other contributions to the field of history have given him a place in the world of academic scholarship." Prof. Burt's "The Romance of Western Canada" was published this year.

Government Farms Are Busy

Extensive Research Carried Out By Dominion Department Of Agriculture

An appreciation of the range and extent of applied agricultural research carried out by the Experimental Farms and stations of the Dominion Department of Agriculture throughout Canada is afforded by the report of the Director, Dr. E. S. Archibald. At the time the report was prepared there were 24 active experimental projects in operation, ranging in application from "Agronomy" to "Toxicology." Horticulture heads the list with a total of 64 active experimental projects; then in order come, animal husbandry, 421; botany, 286; field chemistry, 282; poultry husbandry, 168; agronomy, 149; cereals, 124; chemistry, 105; illustration stations, 76; toxicology, 69; bees, 63, and pathology, 25.

A Misunderstanding

"Surely, John, you haven't brought any one home to dinner?"

"Sure I have. Haven't you got my wife and children?"

"Why, no, you told me you'd bring home a couple of lobsters for dinner."

"So I have. They're waiting in the parlor."

Department of Agriculture Is Studying Problems of The Ranching Industry

The following article was prepared at the direction of Dr. J. H. Griston, Deputy Minister of Agriculture, by Mr. E. S. Archibald, director, Dominion Experimental Farms, Ottawa.

Previous to 1912, when the best cattle industry in Canada was in a thriving condition, a very small investment, outside of that in cattle, was necessary to carry on the business. With the coming of the settler, and the consequent splitting up of the open range, the rancher was confined to a definite area. This change necessitated a more economical use of the range and the construction of fences, the development of watering places, and the production of winter feed. With these increased costs more attention was paid to the class of cattle raised, the percentage calf crop, and the death losses. Although the best known grazing practices were followed there was a decline in the carrying capacity of the ranges, and many areas became badly overgrazed. The result was depleted pastures, less thrifty cattle entering the winter, and sub-normal gains in weight by marketable and breeding cattle.

It was not until 1925 that a demand arose for experimental work on the range, and following a survey in 1926, by the Dominion Experimental Farms, Department of Agriculture, it was decided to conduct experiments on the best grass plots in the study methods of range management, with the object of improving the carrying capacity of the range. The purchase and equipping of an experimental ranch appeared to be unwise because of the large cost involved. It was decided that it would be more economical and more useful to co-operate with some rancher who had a long experience in ranching. The Christ Brothers, of Medicine Hat, Alberta, offered their co-operation, which was accepted and the experiments are now being carried out on this ranch.

The main project under investigation is known as the deferred and rotation system of grazing. It is usually carried out on three pastures, depending upon the conditions under which it is practiced. The system is designed to defer grazing on each pasture twice in six years to allow the pasture to mature a sufficient amount of grass. On the station, four fields, each comprising 3,740 acres, are used to determine the practicability of the system. The fourth field is grazed continuously and serves as a check on the other fields. In order to determine the efficiency of this system of grazing as a whole and whether or not the grass cover is improved, a thorough study of all factors affecting it is made.

An essential factor in range management is a reliable water supply. In this connection the development of natural watering facilities is being investigated. Other factors in range management being studied include the use and sale of the gain in weight by different classes of cattle, the possible limits of the grazing period, the carrying capacity and nutritive value of the range vegetation, the question of deterioration in the feeding value of hay kept several years in reserve, and the effect of frequent cutting on range hay production. As fencing occupies an important place in the range operations, the use of wood preservatives for the posts and cost of construction and maintenance are also being investigated.

Sweden Is Prosperous

Has Small Population But Is Very Progressive

Sweden, which has a population less than that of London, is one of the most prosperous of European countries. Though only a third of the small population lives in towns, Sweden is remarkably go-ahead in all matters of art—the drama, architecture, and so on. The Town Hall of Stockholm is one of the finest modern buildings in the world. The development of Sweden has made a great spur in the affairs of Europe, when, united in national resistance to the encroachment of her neighbors, she waged war on Germany, Russia and Poland; her standards were raised in Munich, Moscow and London. These were the days of Gustavus Adolphus, Charles XII, and eccentric Queen Christina, who dressed as a man and died a pauper in Rome. Today things are otherwise. The country has a great past and a most completed present—which is the best we would desire for any nation.

Woman claims equal rights with man in Japan as a pearl diver. Before the Jap girl is 15 she knows all about diving and is used to bringing up oysters from depths of more than 25 fathoms.

Jinks—"Have you ever lost your temper before your wife?"

Binks—"Now, she beats me to it every time."

"Did he have his car with him? We wondered why he kept asking us to shut the window as we dragged him home."—Ellegance, Blatter, Munich

Might Increase Apple Sales

For Canadian Producers

One of the most interesting and important developments in connection with the marketing of apples in recent years is the automatic vending machine. Officials of the Fruit Branch of the Dominion Department of Agriculture are watching this development with special interest at the present time and Commissioner G. E. McIntosh states: "I think it will provide a new means of marketing apples which will prove at once popular and effective."

The new machines, of which there are two types on the market at the present time, have been tried out with surprisingly satisfactory results on a number of occasions. At the Royal Winter Fair, Toronto, last year, several of these machines were operated and the sales for the machine ranged from 3,000 to 7,000 apples per day.

The automatic apple vendor is a "nickel-and-slot" contrivance by which the customer may select the apple he prefers from a range of sizes, variety and color. Both the wall and cylinder type machine carry the apples in trays with glass tops so that they are entirely visible. The trays are kept in perfect condition through the use of dry ice, and the automatic vendor provides the individual with an opportunity to get "an apple a day," or what is more important, an apple when it is wanted.

An idea of the potential value of these machines in operation is afforded by the experience at the Royal Winter Fair. The machines were in operation for a period of 100 days, and the sales for this period \$425 a box or well over \$15,000 from the machine sales during the period of the Fair.

British Columbia has taken the lead in the introduction of the sale of apples by this type of appliance; and the machines being now in operation in the City of Vancouver and fifty being installed in Victoria.

WORLD HAPPENINGS BRIEFLY TOLD

William J. Locke, widely known British novelist, died in his Paris home, May 15, after a long illness. He was 67 years old.

Hon. W. J. Major, attorney-general, will represent the Manitoba government at the millennial celebration of parliamentary government in Iceland this summer.

The Federal government is seriously considering a proposal strongly advocated by Hon. D. G. McEwen while here—the granting of pensions to the blind.

Through the British embassy at Warsaw, Poland has accepted an invitation to send an official representative to the World's Congress and Congress to be held in Regina in 1932.

There are more people in the world now than ever before, and the records of mankind, figures compiled by the International Statistical Institute show. The total was given as an excess of 2,600,000,000.

What was believed to be a world's record for group parachute jumping was set at Roosevelt Field, N.Y., recently, when 20 men leaped and landed safely from a Curtiss Condor plane, 2,500 feet above this field.

In recognition of thirty years spent in Seattle in the service of his country, Bernard Pelly, British Consul, was presented with the Order of the British Empire. The presentation was made by E. G. Cable, British Consul at Portland.

During the present crop year Saskatchewan Pool Elevators have handled \$7.2 per cent. of all Pool grain delivered in the province, which is the highest percentage that the organization has handled in any crop year to date.

Max Valler, German pioneer in experiment and research with rocket motors, was fatally injured while working on a model of a new liquid oxygen rocket. A piece of the recoil motor blew out and struck Valler in the neck. His jugular vein was severed.

Uniform Codes For Pilots

Necessary For Aviators Flying Over Border Between Canada and United States

Aviators flying over the Canadian border from either side, will be assured of uniform signal codes, in the near future.

Officials of both countries conferred at Washington, recently, for the purpose of providing the best working agreement under which aircraft crossing the border will be assured that the same system of traffic munication of direction-airs prevail on one side as on the other. What is being sought, it is explained, may be considered a uniform code of traffic rules for the air, such as is being worked out for automobiles.

The airways of the United States and Canada are rapidly being linked up, and there is already considerable routine flying from the United States into Canada and return. In order to secure a maximum of safety in these flights, it is essential that the system of communication and radio aids to air navigation used on the Canadian airways be co-ordinated with those used on the United States routes that lead across the border.

How They Saw It

Two elderly ladies arriving in the New York Grand Central terminal the other evening and caught sight of the airplane Bremen up on the balcony. This was apparently their first view of an airplane at close range. They studied it for a while in awed silence, then one of them spoke, in the accents of discord: "It's built on the plan of a bird," she said.

Fond Father: "The man who marries my daughter, sir, wins a prize."

Guest: "My word, that is a novel idea! Is it a money prize or just a silver cup?"

New Use For Wheat

Light Crop Can Be Made Profitable By Feeding To Poultry

With the present uncertainty which prevails in the wheat market the Dominion Department of Agriculture finds that farmers are paying more attention to the marketing of grain crops through live stock. Some interesting and interesting results have come to light, and not the least interesting is the experience of an Alberta farmer who had a light crop which he could not market. He turned to poultry and started feeding the wheat to them and marketing it in the form of eggs through the local egg pool. When the winter was over he figured up the costs and found that he had sold the wheat thus fed at an average price of \$5 per bushel. Another western farmer with a modest flock of 150 birds kept his family throughout the winter on the income from the eggs, and he states that his gross income for the winter from the flock averaged \$200 per month.

The "Departments" of Agriculture and Commerce, and the National Railways, will assume the responsibility of conducting the competitions, but hearty co-operation and support in the carrying out of the entire scheme has been offered by various departments of the provincial government which have tended to do with matters of rural community progress and welfare. Leading men and women in western life also indicated that the project has their support and approval. For the judging of the competitions in each province, a committee of three outstanding citizens will be selected.

It is proposed to confine the competitions to rural municipalities, or groups of school districts within municipalities in which the population is made up of people of continental European descent, first or second generation. It is recognized that the interest which these people take in co-operating to make effective the policies of such departments of government as have to do with agriculture, education and public health, may be regarded as one of the people to the advantages of what the Dominion provides towards influencing their state as good citizens. It has, therefore, been decided that emphasis shall be placed upon the things which these departments regard of greatest importance. Consideration will be given to such matters as percentage of school attendance, efficiency of the school, percentage of young people attending secondary schools, colleges or universities, evidence of interest in membership in organizations for the advancement of agriculture, health and social welfare, percentage of membership in farmers' organizations, such as the Royal Canadian Agricultural Society, agricultural societies, women's institutes, etc., and evidence of general progress towards improvement in agriculture methods, throughout the particular community or area involved. Special consideration also will be given to evidence of community interest in music, arts and handicrafts. In respect to all this, the competitions will take into consideration the full calendar year and awards will be made at the end of each year. In discussing the project, Dr. Black said: "It is recognized that the people in a great many of the communities of European origin in the prairie provinces of Canada have been showing an exceedingly fine interest in making full use of the facilities and influences which our Canadian institutions provide in agriculture, education and otherwise. It is the desire of the railway company, in undertaking to direct their efforts towards a period of five years, to give encouragement to such communities as are showing a determination to make use of and emphasize to the fullest extent the best that our country provides in the development of citizenship."

London's Privilege

A privilege which belongs to the City of London is that its citizens' swords may be carried upright. This privilege was granted to the city in 1354, and where other corporations slope their swords and their swords, the City maces may be carried upright, and the City swords may be carried upright. The City maces are the sword of the State sword is borne before the King, as an emblem of sovereignty.

City Man: "My tailor will be here in half an hour."

By the Way: "Yes sir. Shall I ask him to wait?"

City Man: "Certainly not. What do you suppose I'm going out for?"

Good Revenue From Map Sale

One hundred and fifty-one maps of Canada have been made by the topographical survey since 1917, according to the House of Commons recently, and the cost of compiling these maps was \$960,890. The largest area surveyed was in Manitoba, where 98,247 square miles have been surveyed. The revenue derived from the sale of these maps since 1924 amounts to \$14,590.

Preference From Bermuda

A preference to Canada on agricultural produce and on fish has been granted by Bermuda, according to a telegram received by the prime minister from the Hon. R. Black, Speaker of the Legislative Assembly of Bermuda.

Plan To Encourage Community Progress

Canadian National Railway Will Give Prizes For Competition

Plans which seek to provide a substantial contribution to the encouragement of community progress and development, and the attainment of the fullest possible measure of Canadian citizenship by these rural communities in Western Canada which are of European origin, have been announced by the Canadian railway according to an announcement just made by Sir Henry Thornton from the head offices of the railway company at Montreal.

These plans initiated and developed by Dr. W. J. Black, director of the Departments of Agriculture and Colonization, of the National System, involve the carrying out of a series of competitions among such communities in the three provinces of Saskatchewan and Manitoba, to be held annually for a period of five years, for which the first three prizes will be awarded in each province each year. These prizes will be substantial, the first being \$1,000, the second \$500, and the third \$250, and they will be awarded on the understanding that the money be utilized completely for work of some progressive nature. It is planned to have the competitions commence this year.

The "Departments" of Agriculture and Commerce, and the National Railways, will assume the responsibility of conducting the competitions, but hearty co-operation and support in the carrying out of the entire scheme has been offered by various departments of the provincial government which have tended to do with matters of rural community progress and welfare. Leading men and women in western life also indicated that the project has their support and approval. For the judging of the competitions in each province, a committee of three outstanding citizens will be selected.

It is proposed to confine the competitions to rural municipalities, or groups of school districts within municipalities in which the population is made up of people of continental European descent, first or second generation. It is recognized that the interest which these people take in co-operating to make effective the policies of such departments of government as have to do with agriculture, education and public health, may be regarded as one of the people to the advantages of what the Dominion provides towards influencing their state as good citizens. DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a heavy, bloated feeling and indigestion? May be they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved, by Carter's Little Liver Pills. After meals and neutralize the gases. Swallow the pills and you will relieve the gas and encourage digestion. The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and you enjoy a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

Recipes For This Week

(By Betty Barclay)

TOMATO RELISH

3 cups (1½ lbs.) cooked tomatoes and lemon.
6½ cups (2½ lbs.) sugar.
1 bottle pectin.

Scald, peel, and crush tomatoes. Boil 4 cups crushed tomatoes (fresh or canned) 30 minutes, uncovered, stirring occasionally. Add juice and grated rind of 1 lemon. Measure the cooked mixture into large kettle. Add sugar, mix, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 2 minutes. Remove from fire and stir in pectin. Skim; pour quickly, covered hot, with film of hot paraffin; when relish is cold, cover with ½ inch of hot paraffin. Roll glass to spread paraffin on sides. Set very slowly. Requires about 2½ pounds tomatoes. Makes about 8 eight-ounce glasses.

For plain tomato flavor, omit lemon and use only 2½ cups boiled-down tomatoes. For use with meats, add ½ teaspoon each of ground allspice, cloves and cinnamon.

ROLLED ORANGE WAFERS

½ cup butter.
1 teaspoon soda.
1 tablespoon cold water.
½ cup orange juice.
2 cups flour.

Cream butter; gradually add sugar and orange rind, beating until light; dissolve soda in cold water; add to mixture and knead, alternately with flour, to first mixture. Spread mixture on well-buttered sheet in the thinnest possible layer, and bake in a moderate oven. When baked, cut in squares; quickly roll each square, while hot, over handle of a wooden spoon, and arrange on a dolly-covered plate.

"It is my ambition," says an artist, "to paint a vision of beauty that is so wonderful to be realized in this life." He is just the man to realize the labels on flower seed packets.

Rains in London were so heavy that the streets were impassable for several days.

Reclamation of 1,000 square miles of land of The Pas, Manitoba, is planned.

Perpetual Ocean Travel

Plan Of Philadelphia Broker Has Much To Recommend It

There is something to be said for the plan of the retired Philadelphia broker who has taken up permanent residence on board an ocean liner. The maritime life is not so monotonous as a landlubber might suppose, and the accommodations on one of the larger vessels are fully equal to those available at a first-class hotel. At times, of course, the winds may roar and the waves may roll. But anyone accustomed to the behavior of the market will scarcely mind a little fluctuation now and then.

The opportunities for golf and horseback riding may be limited. But it is usually possible to organize a game of shuffleboard among the smokers. And a permanent passenger, particularly one trained in the brokerage business, should be able to estimate the ship's run with such accuracy as to win the pool every day. He ought, moreover, to make a very good thing of it. There is only one serious drawback to the plan. Has the Philadelphia broker considered having to listen for ever, and ever, to his fellow-passengers' boasting of the number of times they have crossed the Atlantic?

Greater Demand For Wool

Mills Receiving Larger Quantity Than For Some Months Past

While it is a little early in the season to forecast prices for the 1930 wool clip, the Dominion Live Stock Branch reports that wool prices have sagged consistently to lower levels since January 1, and present price indications are that local buyers will be offering around eight to ten cents per pound for ungraded wools.

With prevailing price levels mill buyers show an inclination to operate on a more extensive scale and a larger volume of wool appears to be moving into the mills than for several months past. The 1930 clip of Canadian graded wools will not be available in any large quantities until the latter part of May or early in June, and it is not possible as yet to indicate what prices will be paid for these.

Planning New Drigible

British R-102 Will Be Faster and Larger Than the Others

Britain shortly will build a third giant dirigible for regular trans-Atlantic service. It became known that the ship will be called the R-102; the others being the R-100 and R-101. It is to be larger, faster and more economical than the others.

The plans for the R-102 were said to be in the hands of the designers.

Reclamation of 1,000 square miles of land of The Pas, Manitoba, is planned.

Fast Train Service

Has Been Inaugurated By Canadian National Between Toronto and Vancouver

A new fast service between Toronto and Vancouver was inaugurated by the Canadian National Railways when The Confederation went into service westbound from Winnipeg to Vancouver on May 18.

Westbound between Winnipeg and Vancouver, The Confederation which will operate via Regina, Saskatoon and Edmonton, will be two hours faster than the schedule on which it operated last year, and there will be a further saving of one hour in the time between Toronto and Winnipeg, or a total saving of three and one half hours in the complete journey. Eastbound from Vancouver there will be a saving of two hours and forty-five minutes between Vancouver and Winnipeg, and a saving of forty minutes between Winnipeg and Toronto.

In leaving Toronto the westbound Confederation makes a connection with the new fast International Limited from Montreal. This latter train leaves Montreal at 3 p.m. daily, and makes the trip to Toronto in six hours and is the fastest train in the world over the same distance. By using it and The Confederation, a saving of 13 hours can be made in the time between Toronto and Vancouver, as compared with any existing service over the Canadian National Railways, between those two ports.

The schedule of The Confederation calls for the train to leave Toronto at 9:30 p.m. daily, with an arrival at Winnipeg at 8:15 the second morning. It leaves Winnipeg at 8:45 a.m., Regina at 9:59 p.m., Saskatoon at 10:50 p.m., Edmonton at 8:30 a.m., Jasper at 3:10 p.m., and arrives at Vancouver at 11 a.m.

Eastbound the time of departure from Vancouver is 1:35 p.m., Jasper 9:50 a.m., Edmonton 5:55 p.m., Saskatoon 2:00 a.m., Regina 2:50 a.m., and the arrival time at Winnipeg 5:28 p.m. daily. It leaves Winnipeg at 6:00 a.m. and arrives at Toronto at 7:20 a.m. the second morning.

Under the new schedule as compared with that of last year a morning arrival is made at Vancouver, and an afternoon departure. Last year the train did not arrive until the afternoon and left east bound in the morning. The new schedule makes this one of the fastest trans-continental trains on the continent.

French Ministers Interested

That details of the world exhibition and conferences to be held in Paris, in 1932, be most to over prominent residents of France, was requested of officers of the exhibition. A number of French residents of Canada submitted are deputy ministers of France.

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1817 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. It keeps chickens and turkeys healthy, free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Thursday, June 26, 1930

Next Tuesday is July 1st, and
a Dominion holiday.

Mrs. A. Morrow and son, of
Lethbridge, are visiting with
the former's parents, Mr. and
Mrs. W. Pullen.

Jim Farquharson, forty in-
specter, was a visitor in town,
Tuesday.

Mrs. Reilly and Mrs. Morris,
of Owen Sound, are the guests
this week of Mrs. A. K. McNeill.

The United Church Sunday
School picnic, will be held at
the creek, north of town, Fri-
day afternoon, July 4th. Come,
bring your lunch basket and
enjoy the afternoon. Every-
body welcome.

Here and There

(523) Taking turns while the engine
was under a full load, the
Engineer H. J. Storey and Fire-
man A. Pulkerson, dumped
fire and entered the fire box of
the engine to make running repairs of
gears displaced from the engine
carrier on Canadian Pacific engine
67 at Hope, B.C., recently. The
engine could stand the intense heat
only a few minutes at a time, but they
succeeded in their work and saved
serious delay, bringing their train
to destination within a few minutes
of scheduled time. They were
each awarded a merit mark, the
railway's recognition of conspicuous
merit.

Forty-three years ago May 24
last, the first transcontinental
passenger train reached Vancouver
over the Canadian Pacific
Railway, leaving again next day.
That was eleven months after the
arrival of the first through pas-
senger train at Fort Moody, origi-
nal terminus of the transconti-
nental line.

"Judging from present indica-
tions, there is every reason to be-
lieve that the tourist traffic from
the United States and from other
Canadian provinces to the West-
erns will reach record propor-
tions this season," says George S.
Beir, recently appointed district
passenger agent for the Canadian
Pacific Railway at Saint John,
N.B.

Three important appointments
in the freight traffic department of
the Canadian Pacific Railway have
been announced by George Ste-
phen, newly appointed assistant
freight traffic manager. They are:
—C. E. Jefferson, assistant
freight traffic manager, Winnipeg;
to be freight traffic manager, Mon-
treal; H. W. Gillis, assistant freight
traffic manager, eastern lines, to
go to western lines; and Gerald Hinn, assistant
general freight agent, Mon-
treal, to be assistant freight traffic
manager, eastern lines. The ap-
pointments were effective from
June 1.

A ten day "all expense" tour of
eastern Canada, covering 2200
miles, and including a visit to the
Toronto Exhibition, world's great-
est annual fair, will be conducted
from the Maritimes by Professor H.
L. Stewart, of Dalhousie Univer-
sity, next August. The tour
which will take in most of the
points and cities of interest in the
territory will be over the lines of
the Canadian Pacific, Dominion
Atlantic and Quebec Central Rail-
ways and by Canada Steamship
Lines.

Alberta Institute of Co-operation JULY 2nd to 4th (inclusive) OLDS SCHOOL OF AGRICULTURE

All Phases of Co-operation Discussed by the Leading
Authorities in Canada and the United States, among
them being:

Miss Ruth McCurdy has ar-
rived home after spending the
past nine months in Moose
Jaw, where she attended normal
school.

Mr. and Mrs. R. Currie, of
London, were visitors in town
on Friday.

Mrs. Don, MacRae, and daugh-
ter, Gloria, left on Tuesday
for Saginaw, Mich. to visit at
the home of the former's mo-
ther.

Win Ginnell is now conva-
lescent from his illness, and he
and Mrs. Ginnell have taken up
their residence in the Creamery
building.

Alex. Rowles who underwent
an operation for appendicitis is
progressing favorably.

Football teams from Social
Plains and Letland were visitors
to Empress on Saturday and
engaged with a local team.
The games were interesting
and close and attracted quite a
number of spectators. The local
team was successful in each
game against the visitors.

A. O. MacArthur of the Fuego
Oil Co. was in town on Tues-
day. He reports that they have
succeeded in shutting off the
water at well No. 1 and regard
it as completed. While unable
to go any deeper with the bore
owing to gas pressure, they are
of the opinion the oil flow will
increase. He is expecting to
commence work on No. 2 in
two week's time. He had a
number of interesting fossils
that had been thrown from the
bottom of well No. 1, one of
which was part of the head of
a petrified fish.

The Last Straw

The stout woman had been
in the boot shop nearly an hour,
and the patient shop assistant
had had half the stock down
for her inspection.

"Those would suit you," he
said as a last resource, taking
down another pair. But still
she was not satisfied.

"I don't like those," she said.
"They have a tendency to grow

wider when they are a bit old."
"Well, madam," replied the
exasperated assistant, "didn't
you?"

Great Amount Of Food In Storage

Ottawa—The June prelimi-
nary statement of food commodi-
ties in storage in Canada, as
issued by the Bureau of Statis-
tics, show that there is ap-
proximately one and half times
the amount of food in storage
as there has been for the last
year average. Thus there is
over 2,000,000 pounds of beef
in storage in excess of last
year's and the five year's aver-
age. The present total is
11,612,828. Butter, mutton or
or lamb, veal and poultry of all
descriptions are also more
higher in amount than during
the five year average.

Some Serious Diseases Of Crop Plants

Successful farming 'oper-
nds upon many factors, important
among which is the extent to
which the crop plants suffer
from disease. The extent of
losses in Canada through the
ravages of plant diseases is
represented by millions of dol-
lars a condition which may be
appreciated readily by apply-
ing the principles recommended
by the plant pathologists of
the Experimental Farms. Until
recent years the farmer, know-
ing little relating to the nature
of plant diseases, was often un-
aware of the fact that his crops
suffered serious losses from
this cause. Generally such mat-
ters were viewed as natural un-
durdencies and accepted as such.
Today, however, the situation
has improved, for with the aid
of easily accessible literature,
the farmer has acquired a

splendid working knowledge of
the symptoms and control of
the more serious diseases of
crop plants. In other words,
the farmer's power over dis-
eases which cause these losses
was never as great as it is at
the present time of agricul-
tural development. One by one
the organisms responsible are
being studied and from the
facts obtained the investigator
is in a position of devising
means to prevent their des-
tructive effects.

It is shown now that most
plant diseases are caused by
micro-organisms which live
upon and absorb their food
from the crop plant in which
there is accordingly produced a
diseased condition. These dis-
eases which result from the
action of germs or organisms
are known as parasitic diseases.
To this group belong such dis-
eases as the smuts, rusts, and
root rots of wheat, oats and
barley, blight of potatoes, apple
scab, club root of turnips,
peach leaf curl and many more
of great importance. Disorders
caused by unfavorable condi-
tions of environment such as
heat moisture and frost supply
are known as non parasitic dis-
eases and in this group we find

Site of the Canadian province,
Nova Scotia, New Brunswick, Que-
bec, Manitoba, Alberta and British
Columbia, have taken advantage of
the Farm Loan Act of Canada, a
Dominion Government measure
under which long term mortgage
credit is extended to Canadian
farmers. At the end of last March
the total amount of \$4-
\$51,600 had been approved.

Canada leads in the following:
—For farming production: wheat
and flour exports; world's wheat
championships; railway mileage
per capita; high grade wheat
production; world's per capita
trade; newspaper production of
the world; hydro power develop-
ment per capita; life insurance
per capita in the empire; world's
largest inland port—Montreal;
world's largest exporter of its kind
—"Pall Mall"; and largest dis-
tributed gala outlet in the world.
